

*Discovering Psychology*  
*The Science of the Mind*  
3rd Edition AP®, ©2019

Powered by You! MindTap gives teachers complete control of their course to craft a personalized, engaging learning experience that challenges students, builds confidence and elevates performance. With MindTap you can deliver online homework that includes videos, assessments, study tools and seamless access to the eTextbook. MindTap is easy to access, easy to implement, and easy to use!

*Discovering Psychology* presents psychology as a unified science that seeks a complete understanding of the human mind, rather than as a loosely organized set of autonomous subspecialties. The writing and features are smart and engaging, and consistently illustrate the benefit of using multiple perspectives within psychology. Cacioppo and Freberg offer the best science possible, including exciting new research findings likely to expand students' understanding of psychology as a scientific field of study.

Students will be able to:

- Interact with the text and multimedia
- Receive immediate feedback from auto-graded quizzes
- Check their understanding

### MindTap Feature Description

Activity	Why it matters?	How many and where?	What is it?	Asset type and seat time
