<b>8.11:</b> Volume with Washer Method: Revolving Around the <i>x</i> - or <i>y</i> -Axis	<ul><li>CHA-5: Definite integrals allow us to solve problems involving the accumulation of change in area or volume over an interval.</li><li>CHA-5.C: Calculate volumes of solids of revolution using definite integrals.</li></ul>	CHA-5.C.3	6.2, pp. 423-425
<b>8.12:</b> Volume with Washer Method: Revolving Around Other Axes	<ul><li>CHA-5: Definite integrals allow us to solve problems involving the accumulation of change in area or volume over an interval.</li><li>CHA-5.C: Calculate volumes of solids of revolution using definite integrals.</li></ul>	CHA-5.C.4	6.2, pp. 423-425
8.13: The Arc Length of a Smooth, Planar Curve and Distance Traveled BC ONLY	<ul><li>CHA-6: Definite integrals allow us to solve problems involving the accumulation of change in length over an interval.</li><li>CHA-6.A: Determine the length of a curve in the plane defined by a function, using a definite integral. BC ONLY</li></ul>	CHA-6.A.1	6.4, pp. 440-443

### Course: AP® Calculus BC Only

Unit 9: Parametric Equations, Polar Coordinates, and Vector-Valued Functions

Suggested Length: AB Not Applicable BC ~10-11 class periods AP Exam Weighting: AB Not Applicable BC 11-12%

Big Ideas: Change (CHA); Analysis of Functions (FUN)

Торіс	Enduring Understanding and Learning Objective	Essential Knowledge	Text Section(s) & Page Number(s)
<b>9.1:</b> Defining and Differentiating Parametric	<b>CHA-3:</b> Derivatives allow us to solve real-world problems involving rates of change.	CHA-3.G.1	9.3, pp. 655-658
Equations BC ONLY	<b>CHA-3.G:</b> Calculate derivatives of parametric functions. <b>BC ONLY</b>	CHA-3.G.2	9.3, pp. 655-658
9.2: Second Derivatives of Parametric Equations BC ONLY	<ul> <li>CHA-3: Derivatives allow us to solve real-world problems involving rates of change.</li> <li>CHA-3.G: Calculate derivatives of parametric functions. BC ONLY</li> </ul>	CHA-3.G.3	9.3, p. 656
<b>9.3:</b> Finding Arc Lengths of Curves Given by Parametric Equations <b>BC ONLY</b>	<ul><li>CHA-6: Definite integrals allow us to solve problems involving the accumulation of change in length over an interval.</li><li>CHA-6.B: Determine the length of a curve in the plane defined by parametric functions, using a definite integral. BC ONLY</li></ul>	CHA-6.B.1	9.3, pp. 657-658
<b>9.4:</b> Defining and Differentiating Vector-Valued Functions <b>BC ONLY</b>	<ul> <li>CHA-3: Derivatives allow us to solve real-world problems involving rates of change.</li> <li>CHA-3.H: Calculate derivatives of vector-valued functions. BC ONLY</li> </ul>	CHA-3.H.1	9.7, pp. 689-693
9.5: Integrating Vector-Valued Functions BC ONLY	<ul> <li>FUN-8: Solving an initial value problem allows us to determine an expression for the position of a particle moving in the plane.</li> <li>FUN-8.A: Determine a particular solution given a rate vector and initial conditions. BC ONLY</li> </ul>	FUN-8.A.1	9.7, p. 694
<b>9.6:</b> Solving Motion Problems Using Parametric	<b>FUN-8:</b> Solving an initial value problem allows us to determine an expression for the position of a particle moving in the plane.	FUN-8.B.1	9.8, pp. 698-700
and Vector-Valued Functions BC ONLY	<b>FUN-8.B:</b> Determine values for positions and rates of change in problems involving planar motion. <b>BC ONLY</b>	FUN-8.B.2	9.8, p. 701
<b>9.7:</b> Defining Polar Coordinates and Differentiating	<b>FUN-3:</b> Recognizing opportunities to apply derivative rules can simplify differentiation.	FUN-3.G.1	9.4, pp. 663-669
in Polar Form BC ONLY	<b>FUN-3.G:</b> Calculate derivatives of functions written in polar coordinates. <b>BC ONLY</b>	FUN-3.G.2	9.4, pp. 667-668
