MATH ELECTIVES AND AP® MATH

PROGRAM OVERVIEW

OKLAHOMA

Dear Oklahoma Administrators and Educators,

National Geographic Learning, a part of Cengage, is pleased to present the following catalog of **Advanced and Elective Math** titles for the 2023–2024 Oklahoma adoption. This catalog features a wide variety of learning solutions designed to fit your curriculum in all areas of higher level mathematics.

Please contact us for all your state-specific adoption needs, including:

- Product details or questions
- Presentations
- Ancillaries

- Digital review access
- Correlation guides
- Training

National Geographic Learning | Cengage is as committed to helping your students succeed in the math classroom as you are. Our wide selection of both student and teacher learning solutions feature up-to-date content combined with the latest technology that provide interactive content, assessments, and simulations to help prepare students for college and career success.

We appreciate that you have many choices when selecting a solutions provider and we thank you for giving us the opportunity to partner with you.

DIGITAL LEARNING SOLUTIONS

Cengage WebAssign

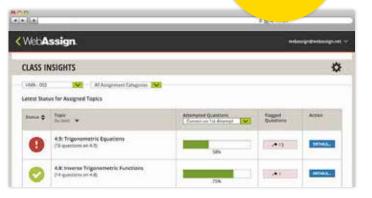

Access Exceptional Mathematics Content

WebAssign® engages students with immediate feedback, rich tutorial content, and an interactive, customizable eBook. Teachers have real-time assessment of student performance.

- Customize assignments knowing all questions can be randomized
- A sophisticated gradebook allows easy assessment of student performance and needs
- Easily manage any class size, including classes with multiple periods
- Unparalleled customer service available everyday
- Choose from a wide variety of question types

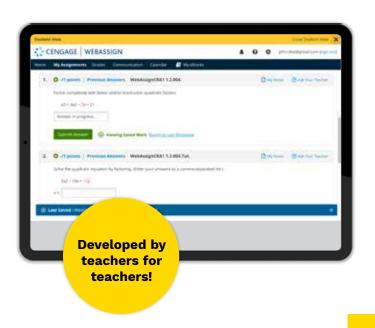

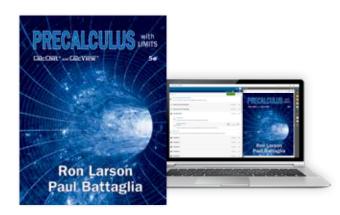

Built for Mathematics and Statistics Courses!

Cengage MindTap

- A personalized learning environment,
 MindTap combines learning tools into a single learning path
- Multimedia, activities, and assessments are easily accessible
- Customizable learning tools empower instruction

Precalculus with Limits

Larson, Battaglia

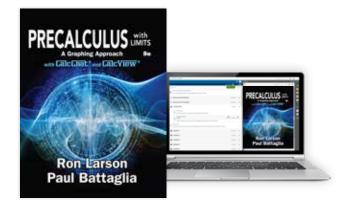

Grades 11–12 Fifth Edition ©2022 9780357643273

- Known for delivering sound, consistently structured explanations and exercises of mathematical concepts, with a laser-focus on preparing students for calculus
- Provides a brief algebra review to the core precalculus topics, coverage of analytic geometry in three dimensions, and an introduction to concepts covered in calculus
- Stepped-out solution videos with instruction are available for free at CalcView.com for selected exercises throughout the text
- Features Chapter and Section Overview videos in which co-author Paul Battaglia reviews the main concepts being taught and provides teaching tips and strategies

Precalculus with Limits: A Graphing Approach

Larson, Battaglia

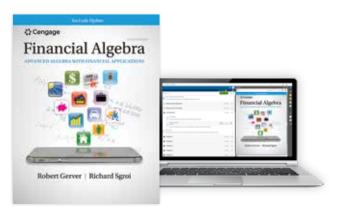

Grades 11–12 Eighth Edition ©2020 9781337904285

- Strengthens students' conceptual understanding and problem-solving skills with frequent use of graphing calculators, and is intended for classes in which graphing calculators are readily available to all students
- Incorporates technology, problem-solving strategies, real-life applications, and concept reinforcement to help students develop strong precalculus skills
- Facilitates familiarity with the basic functions by retaining its compilation of several elementary and non-elementary functions in a "Library of Parent Functions"
- Includes many examples that present side-by-side solutions with multiple approaches: algebraic, graphical, and numerical
- Stepped-out solution videos with instruction are available for free at CalcView.com for selected exercises throughout the text
- Features Chapter and Section Overview videos in which co-author Paul Battaglia reviews the main concepts being taught and provides teaching tips and strategies

Financial Algebra: Advanced Algebra with Financial Applications, Tax Code Update Gerver, Sgroi

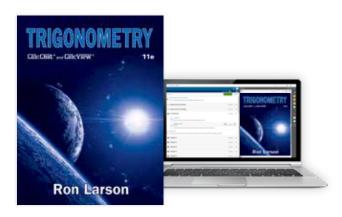

Grades 9-12 Second Edition @2021 9780357423509

- · Updated to reflect 2019 tax code updates.
- Encourages students to become actively involved in applying mathematical ideas to topics that are increasingly important in their everyday lives: credit, banking, insurance, the stock market, independent living, and more
- Combines algebraic and graphical approaches with practical business and personal finance applications that motivate high school students to explore algebraic thinking patterns and functions in a financial context
- Helps your students achieve success by offering an applications-based learning approach incorporating algebra I, algebra II, and geometry topics
- A strong review of algebra I formulas with variables, equations, functions, systems of equations, graphs, statistics, and more within a financial context creates connections with students
- Students see algebra translated into powerful, financially focused, real world problems

Statistics: Learning from Data, AP® Edition Updated

Peck, Short, Olsen

Grades 11–12 Second Edition Updated ©2022 9780357540312

- Offers an innovative approach to teaching and learning AP®
 Statistics, tackling the areas that students struggle with most: probability, hypothesis testing, and selecting an appropriate method of analysis
- Guides students in gaining conceptual understanding, mechanical proficiency, and the ability to put knowledge into practice—supported by learning objectives, real-data examples and exercises, and technology notes
- Provides probability coverage based on current research that shows how students best learn the subject
- Includes two unique chapters on statistical inference and learning from experiment data, which address two common areas of student confusion: choosing a particular inference method and using inference methods with experimental data
- New AP® Content includes "AP® Review Questions" at the end of each chapter, "AP® Exam Tips" integrated in the margins of the text, and "Avoid These Common Mistakes" sections at the end of each chapter, which point out common errors students make on the AP® exam

Hardcover, 1,008 pages
